### 📄 Summary

Motivated and detail-oriented Frontend Developer with a Master's degree in software engineering. Skilled in translating design concepts into responsive, accessible, and user-friendly web applications using react, javascript, and tailwind CSS. With a strong foundation in UI composition, state management and RESTful API integration. Currently expanding expertise in backend development, with a solid understanding of Node.js, Express, RESTful APIs, and relational databases, plus basic knowledge of software testing. With a great aptitude for learning, and a rapid ability to adjust to technologies, as well as strong problem-solving skills. Seeking a web developer position to contribute to modern, data-driven software solutions and grow within a collaborative, innovation-oriented environment.
